

**TITTLE:**

Risk behaviour and leisure activities for children before they are placed in Children's home

**ABSTRACT:**

Thesis Risk behavior and leisure activities for children they are placed in children's home is oriented on the factors that influence spending time children before they are placed in a children's home and how spend children their time. In the theoretical part of my work dealing with the substitute family care and family preservation. The chaps risk behaviour and leisure time are fundamental. Where I try to focus specific These two parts with regard to children before placed in childrens home. The practical part of this work was founded of visits two childrens homes. Where I studied documentation and did twenty-six interviews with children. The main part is devoted to the presentation of the obtained results, so how children spend their time before they are placed in a children's home. The results are analyzed and possible solutions and recommendations for working with children and families in family preservation.
